

Citations

For most of the needs I used <https://www.w3schools.com/default.asp> website and different sources from it.

Also, I used Google for looking pictures up.

Besides, for color schematic I used:

<https://color.adobe.com/create>

<https://encycolorpedia.ru/ffa812>

For fonts downloading I used Goggle Fonts:

[https://fonts.google.com/specimen/Lato?](https://fonts.google.com/specimen/Lato?preview.text_type=custom&selection.family=Lato:ital,wght@0,400;0,700;1,400|Open+Sans&sidebar.open=true#standard-styles)

[preview.text_type=custom&selection.family=Lato:ital,wght@0,400;0,700;1,400|Open+Sans&sidebar.open=true#standard-styles](https://fonts.google.com/specimen/Lato?preview.text_type=custom&selection.family=Lato:ital,wght@0,400;0,700;1,400|Open+Sans&sidebar.open=true#standard-styles)

I used stackoverflow when there were some problems with the code and its logic.

Besides, I took some tips and code snippets from:

<https://css-tricks.com/custom-list-number-styling/>

Finally, I used Bootstrap for linking it to my main html file and creating a grid.
